<b>Explanations</b>	

Considering the low feasibility of hydrogen transformation in the energy sector and the up-to-date publicly disclosed targets of our Group companies that have set reduction targets, our Board of Directors resolved to update Koç Holding's 2030 interim Scope 1 and Scope 2 greenhouse gas emission reduction target (compared to base year 2017) to 20% (from 27%). Our carbon-neutral target for 2050 remains unchanged.

In this regard, the 2024 TSRS Compliant Sustainability Report, which also encompasses the revised targets, and which has been prepared in accordance with the Turkish Sustainability Reporting Standards (TSRS) as required by the Turkish Public Oversight, Accounting and Auditing Standards Authority, and has been subject to mandatory sustainability assurance audit by Güney Bağımsız Denetim ve Serbest Muhasebeci Mali Müşavirlik A.Ş., is enclosed herein. In addition, the 2024 Sustainability Report prepared for disclosing comprehensive information regarding our company's sustainability practices to the public is available on our corporate website ([www.koc.com.tr](http://www.koc.com.tr)).

This statement has been translated into English for informational purposes. In case of a discrepancy between the Turkish and the English versions of this disclosure statement, the Turkish version shall prevail.
